Pune / Mumbai, IN | Portfolio | LinkedIn

Tech Stack: Java 21 | Spring Boot 3 | Microservices | Apache Camel 4 | Confluent Kafka | Angular 14 | Oracle | Redis | REST API | IBM MQ | Docker | Smart Stream TLM CM | AWS | Azure | Dynatrace | Netflix Orkes Conductor | Kubernetes | AWS | Ansible Tower | GitLab | CICD | ISO15022 | ISO20022

Domain: Finance | Core Banking | Cross Border Payments | Investment Banking | Regulatory Banking | Capital Markets | Insurance | Manufacturing

SUMMARY

with over 9 years of technology experience, **currently with Abu Dhabi Commercial Bank** in **Core Banking** domain and previous to that **Bank of New York Mellon's Derivative Markets Management** department. I've also worked with **Reserve Bank of India**, contributing to national initiatives. As a technologist specializing in Application Development and DevOps, I excel in creating enterprise-ready, scalable solutions using cutting-edge technology. I'm an excellent team player and a quick learner, experienced with modern frameworks, best practices, and technologies.

WORK EXPERIENCE

Abu Dhabi Commercial Bank — Dubai, UAE

Sr. Software Engineer — Dec 2025 - Mar 2026

UAEs #3 rd largest bank

- Contributed to development and support of **10+ Spring Boot microservices within the onboarding platform**, **acting as a secondary owner** responsible for incident resolution, production stability, feature enhancements, and performance improvements.
- Implemented **document verification for security** by implementing **Diffie Hellman + SHA-256** based **signature validation,** enabling **secure end-to-end verification** between frontend and backend services**.**
- **Optimized database connection pool configuration** across 76 microservices, **reducing CPU utilization from 190% to 70%,** significantly improving system performance, resource efficiency, and production stability.
- Designed and implemented **orchestration workflows using Netflix Orkes Conductor**, integrating multiple onboarding microservices with a centralized EDMS document management platform, improving reliability and automation of regulatory document processing.
- Built a Redis-based caching **proof-of-concept** to **optimize high-frequency API reads**, **reducing response latency by 40% and lowering database load by 60%.**
- Developed an automated signature verification module using image-processing algorithms to detect black/blue ink signatures on white-background documents, enabling reliable digital validation and reducing manual verification effort.
- Productionized FATCA/CRS declaration and digital signature upload capabilities, enabling automated regulatory compliance workflows for customer onboarding while ensuring secure document handling and audit readiness
- Technologies: **Java, Spring Boot, Netflix Orkes Conductor, Open API, SoapUI, Confluent Kafka, Postgres, Docker, Kubernetes, GitHub, Azure, Dynatrace** etc.

Bank Of New York and Mellon — Pune, Maharashtra

Sr. Full Stack Engineer — Jan 2022 - Nov 2025

Serving clients globally as the largest custodian bank for over 240 years.

- Worked for SWIFT in the **Derivative Margin and Collateral Management** division for the ecosystem of High-Value Bank-to-bank international Payment Transactions.
- Designed and **developed Self Service Portal** for New edged microservices configurations for multiple clients like Bridgewater, OnCore, GMAgency etc.
- Designed and scaled a Spring Boot service to process high-volume **SWIFT collateral payments**, **ensuring ISO 20022** compliance for global banking clients such as Bridgewater and GM Agency. Managed workflows for

MT202, MT210, MT292, MT103, MT192, pacs009, camt057, and camt056, facilitating high-value bank-to-bank collateral transfers.
- **Designed and developed Apache Camel Based Generic Micro Services** for reporting in which the multiple reports will be sent across multiple clients based on a database configuration.
- **Accelerated release cycles by 80% by implementing end-to-end CI/CD pipelines** using Python, GitLab, Ansible and Ansible Tower reducing downtime and deployment errors across 20+ services.
- Modernized legacy fintech systems by migrating internal and external portals to Java JDK 17+, **improved performance benchmarks by 30%** and reducing technical debt, resulting in enhanced maintainability and security compliance.
- **Designed and developed automated settlement workflow for SWIFT payments using IBM MQ messaging Queue** for Smart Streams TLM in Cash, Interest, Substitution and Margin Call.
- **Implemented IBM MQ Encryption protocol** across the DMM platform services.
- Played a crucial role in database password change across the 238 accounts in the bank as a part of US FED regulations.
- Actively participated in Agile sprint ceremonies including planning, daily stand-ups, and retrospectives to ensure smooth delivery and team alignment.

  Technologies: **Java, Spring Boot, Apache Camel, Angular, IBM MQ, Kubernetes, Flask, Oracle, Snow flake, Docker, Ansible, Ansible Tower, GitLab, AWS S3, EC2 etc.** Standards I have worked on: **ISO15022, ISO20022 MT and MX SWIFT Payments.**

Reserve Bank Information Technology Pvt. Ltd. — Mumbai, IN

Full Stack Engineer — Jul 2020 - Jan 2022

A company setup By India's Central Bank (Reserve Bank of India) for all its Software Development needs.

- Spearheaded end-to-end development of a regulatory sandbox fintech platform using Spring Boot, Angular, Docker, Oracle, and AWS, enabling secure API testing and reducing time-to-compliance for financial institutions by 40%.
- Played a key role and individually contributed the development of Admin Dashboard, Jasper MIS Reports and User Recertification modules.
- Technologies I Have worked here on **Angular, Prime Ng, Spring Boot, Oracle, Jasper Reports, Docker GitLab and AWS**.
- Implemented a secure coding standard suggested by National CISO team. additionally, wrote a SOP to enhance security of java Spring Boot based applications.
- POC developed for SAP HANA workflows using Spring Boot, Apache Kafka Connect and Angular using Change Detection Capture Design Pattern

Mahindra and Mahindra Ltd — Mumbai, IN

Full Stack Engineer [Neo Soft Tech Ltd. CMM-V] — Oct 2018 – June 2020

A leading service-based organization with CMMI Level 5 accreditation

- Designed, architected Chat Application and Qlik Sense Chatbot framework using Angular, Node JS, MongoDB, Docker, AWS etc. A fully configurable chatbot framework using admin portal.
- developed end to end Mahindra Chat App from scratch using Angular7, Node JS and mongo DB. Involved in required gathering to production deployment.
- Provided technical leadership in cross-team initiatives, mentoring junior developers, driving code quality and architectural decisions, and successfully bringing high-impact applications from design to production with a focus on performance, security, and maintainability
- Technologies: **Angular, Node JS, MongoDB, Docker, GitLab and AWS**

63 Moons Technologies India Limited — Mumbai, IN

Software Engineer — Mar 2017 – Oct 2018

India's No 1 Stock Exchange Trading Platform Provider

- Herewith, worked on SMC Global Project.
- Developed analytics dashboard covering Equity, Commodities, F&O, Currency, and Fundamentals with 15+ dynamic widgets—enhancing trader insights and investor profiles
- Engineered a real-time analytics engine using Redis Cache and Spring Boot REST APIs, capable of generating alerts for 72+ business rules, significantly improving proactive decision-making for brokers and reducing reaction time in volatile market conditions
- Developed overall health Indicator for scrip which gives an overall scrip information with fundamentals in an animated graphical format using animated tree chart of D3.

- Technologies: **Angular, Spring Boot, SQL Server, Redis, Docker, GitLab and AWS**

EDUCATION

- **PG-DAC (Post Graduate Diploma in Advanced Computing)** - University of Mumbai - First Class with Distinction
- **Bachelor Of Engineering** - University of Mumbai - First Class with Distinction

ACHIVEMENTS

- **BNY Mellon's Spot Light Award Year 2025**: For successful implementation of Release Automation Project.
- **BNY Mellon's Passion for Excellence Award Year 2024**: For successfully implementing MQ TLS.
- **Passion for Excellence Award**: For excellent contribution in UMR Phase 6 IMSEG project. (September 2022)
- **Best Performer of The Year 2019** from Neo Soft Technologies.

STRENGTHS

- **Thrive for Process Optimization by Employing Automation.**
- **Driven by innovative solution delivery and a continuous improvement mindset.**
- **Trusted Team Contributor**
